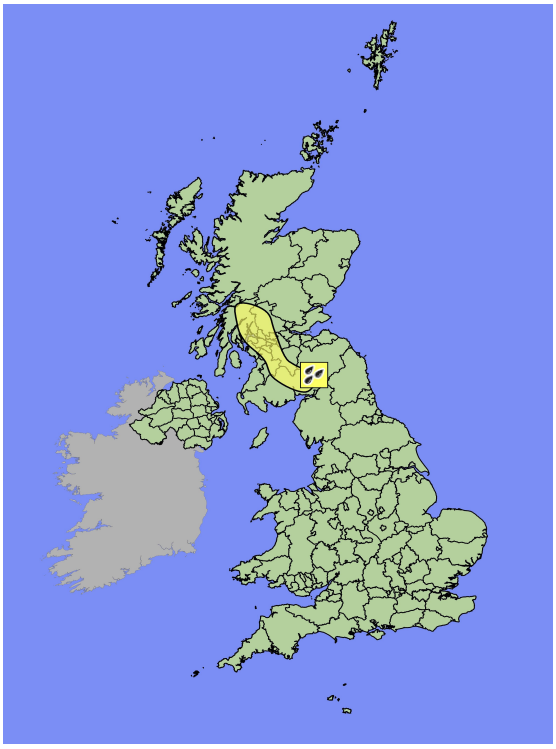
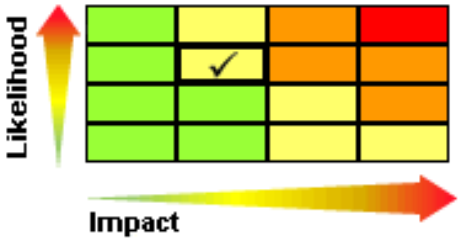
National Severe Weather Warning Service





CANCELLED

Chief Forecasters Assessment
The rain will be of a showery nature, although more intense bursts could give 10-20 mm within a few hours, and isolated daily falls exceeding 30 mm could occur. Falling onto wet ground, these amounts could lead to some localised problems. The rain will ease from the north through the middle part of the day.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **01:05 on Wed, 11th Jul 2012** until **15:00 on Wed, 11th Jul 2012**

Outbreaks of rain, heavy at times, on Wednesday morning, will tend to clear southwards into the afternoon.

The public should be aware of the likelihood of standing water and spray on roads and perhaps some localised flooding.
